

Airstar

Airstar balloon lights deliver soft uniform light over 360° with only one unit. These lights are available in many different shapes and sizes in HMI, Tungsten and Sodium Hybrid colour balanced models. Fixtures are available from 1,000 W to 16,000 W and many have adjustable power outputs from one quarter to full power. The balloons can be filled with either helium or air. WFW continues to build upon its inventory with Airstar's worldwide technical support so please look for new additions of Airstar products at your local WFW.

Airstar Features
