

# BOLT HIGH-SPEED CINEBOT

## CRANES

### WHITES SPECIALTY EQUIPMENT

The Whites Bolt delivers stunning new possibilities to high-speed cinematography. The Bolt accelerates to its maximum velocity almost instantly, so even 1000 fps + shots come alive with motion. The Bolt is driven by the award winning Flair software with absolute precision and the ability to drive multiple motion control units, triggering devices, dmx lighting, etc. The Bolt can be used in studio or on location with a customized base, delivering the creative tools where you need to be.

#### Bolt Quick Specs

##### Operating Envelope

Max. Height	2.45m
Min. Height	0m
Max. Reach (from rotate center)	1.5
Max. Camera Payload	20kg

##### Rig Performance

Rotate	+/- 160°	200°/sec
Lift	+/- 137°	200°/sec
Arm	+/- 150°	255°/sec
Pan	+/- 270°	315°/sec
Tilt	+/- 120°	350°/sec
Roll	+/- 270°	870°/sec

##### Practical Shooting Speeds

1m vertical move	Half a second
1m Horizontal move	Half a second
Complete 180° arc with 75cm radius	1.5 seconds
Complete 180° arc with 45cm radius	1 second
